

## REMARKS

Although Applicant traverses the Examiner's position and interpretation of the term "cable-free", in order to expedite allowance of the claims, independent claims 1, 6, and 13 have been amended. These claims now specifically recite that the radio-based wireless and cable-free bi-directional communication is between at least one communication device, such as device 8 in Figure 1, and the face master control sided radio transmission device, such as 9 in Figure 1. Such communication is shown in Figure 1 by arrow 11. Please refer to paragraph 0016 and Figure 1 of the application which describes this "cable-free" communication as between the second face master control sided radio transmission device 9 and a radio transmission device 8.

It is respectfully submitted all claims remaining in the application (Claims 1-18) are in condition for allowance.

Respectfully submitted,

FAY, SHARPE, FAGAN,  
MINNICH & McKEE, LLP
